

American Quad Umbrella

American Quad

The American Quad Offset Umbrella is our largest heavy duty offset umbrella and deservedly the most distinctive industrial grade cantilever umbrella in the market. It is made up of four umbrellas, having one central pole. It simply maximizes your available covered shaded area and is strictly a commercial cantilever umbrella. This large cantilever patio umbrella is available in 16.5'x16.5', 20x20', 20'x26', 23x23' and 26'x26' dimensions which cover 400 to 676 square feet of area. The structure is made out of powder coated steel with Industrial Grade Aluminum spokes making this umbrella ideal for even the harshest conditions. The entire structure of this heavy duty cantilever umbrella comprises of interchangeable parts, providing extreme durability. Powder coating on this product is available in Black, Brown, White and Grey color variants or you can specify which one suits you best. Our umbrellas are handmade in Europe by artisans who put details into great consideration.

Custom shapes and sizes can be request.

Options

Multi-vent Canopy

Give a special look to your patio by upgrading your Umbrellas with the multi-vent canopy. This technique is created by overlapping fabric's strips, **putting an end to the "sail effect"** caused by the wind against the canopy. This technique does not, in any way, compromise the waterproofing characteristics of the umbrella. Allowing the air to pass through easily giving more stability to the canopy.

Let your imagination fly! Play with colors and shapes. Ask for more photos to show you many other options with this upgrade or visit our website.

Double fabric is available too!

Enclosure

Create a nicer environment for your customers with side panels

Made with 100% Acrylic fabric and Clear PVC.

Keep the heat inside in the winter

Keep the cool inside in the summer. Protection from rain and wind.

Rain gutters

All our Umbrellas can be connected utilizing Industrial Grade Velcro strips and fabric gutters.

You can direct the water from the rain to any direction you want as the gutters are elongated on one side.

Customization for gutter color is available. Easy to install

Gutters are available on canopies with or without a valance.

Lighting and Heaters

Romeo's Restaurant in Wellington, FL

EverBank Field Home of the Jacksonville Jaguars

Miami Dolphins Stadium

Sunlife Stadium has our Quadruple umbrella in all the outdoor areas in many colors. They added lighting on the post for use during night games

This has been the model of choice for stadium installations as they can accommodate large crowds.
