

Freedom Double Umbrella

Freedom Double

The Freedom double offset umbrella gives twice as much shade with a single post.

Our double canopy side post is ideal for long narrow Spaces providing shade from 200 to 400 sqft.

Both the post and side arms are constructed of power coated steel with industrial grade aluminum spokes designed to handle the most rugged conditions. With all replaceable parts this shade is built to last for many years.

The powder coatings are available in Brown, Black, Grey, and White or can be custom ordered using the color(s) you prefer. Our double patio umbrella is made by hand in Europe by artisans who are simply great at what they do.

Sizes available: 10'x20', 11.5'x23', 10'x26' and 13'x26', 8'x16', 10'x23'.

Custom shapes and sizes can be request.

Rotation

Simple • Elegant • Versatile

The two umbrellas can be oriented and moved when closed to 'follow' the shade during the day. The entire structure is made of thick galvanized steel and painted in the selected color of your choice. The Freedom Double umbrella has an innovative but simple design. The finely polished AISI 316 Stainless steel version of this double patio umbrella is suitable for most exclusive modern environments and luxury yachts.

The Clean lines and revolving design make it versatile and suitable for all environments. It is mostly requested for terraces and platforms, where the traditional concrete base would limit the useful ground space.
